

Will the HVAC/R industry become carbon neutral?

How has the European Climate Law "turned" the Green Deal commitments into obligations? What will be the role of the HVAC/R sector in this change?

The **CAREL Sharing Ideas blog** has always aimed to share studies and opinions from the viewpoint of the individual authors on HVAC/R issues. Over the last few months, the most popular topics relate to a more general issue: **climate change**.

Below you can find two recent posts exploring the questions that every player in the HVAC/R sector is asking: when will we be able to reach the **zero emissions target**? How will EU legislation transform the EU into a modern, resource-efficient and competitive economy? Will we live in a **carbon neutral world**?

If these topics affect your business and you find them interesting... Keep reading our blog!

The European Union's "Fit for 55" legislative package

By [Raul Simonetti](#), HVAC/R Corporate Business Manager

What are the basic concepts at the heart of the EU's "Fit for 55" legislative package?
